

Mehdi Vahabisani

BUSINESS SYSTEMS ANALYST • REQUIREMENTS, UML & BPMN

+1 604 365 3208 • mehdivahabisani@gmail.com

SUMMARY

Business Systems Analyst with 3+ years of industry experience translating business needs into clear software requirements using UML, BPMN 2.0, and user story mapping. Skilled in requirements elicitation, process modeling, UI wireframing, and technical documentation (SRS, use cases, product vision), with a systems and industrial engineering foundation and graduate research in decision intelligence and human centered AI at Simon Fraser University.

AREAS OF EXPERTISE

- **Analysis & Design:** requirements elicitation, UML 2.0 modeling, data modeling (ERD), UI prototyping and wireframing, user story generation and mapping, SRS and technical documentation, test case and scenario writing, UX research, BDD, DDD
- **Business Process Management:** process identification and architecture, BPMN 2.0 modeling, process frameworks (APQC, SAP, ITIL), process documentation and implementation
- **Project Planning:** Agile methodologies (Scrum, Kanban), business planning, project cost and effort estimation

TOOLS & SKILLS

- **Modeling & BPM:** Visual Paradigm, Enterprise Architect, Microsoft Visio, Bonita BPMS, Bizagi BPMS
- **Design & Project:** Figma, Adobe XD, JIRA, Trello, MS Project
- **Data & Programming:** Microsoft SQL Server, Python, C++, C#, JavaScript, HTML, CSS, SVG, D3.js; GAMS, Vensim, SPSS
- **Office:** Word, Excel, Access, PowerPoint

ACADEMIC & RESEARCH EXPERIENCE

Research Assistant, Simon Fraser University

Decision intelligence, visual analytics, human centered AI (Supervisor: Dr. Brian Fisher)

Apr 2023 to Present

Surrey, BC

Research Assistant, Tarbiat Modares University

Agile software development and software development risk assessment

Sept 2019 to Dec 2022

Tehran, Iran

Research Assistant, University of Tehran

System dynamics modeling, macroeconomic policy planning, water food energy nexus

Dec 2018 to Sept 2019

Tehran, Iran

EXPERIENCE

Software Designer

Integrated Science Lab

2023 to Present

Surrey, BC

- Analyzed the requirements of a multi stage, causality driven decision support system
- Designed mid to high fidelity UI wireframes of the system
- Implemented a few interfaces using HTML, CSS, JS, SVG, and D3.js

Systems Analyst & Tester

System Group Co.

Nov 2021 to Sept 2022

Tehran, Iran

- Elicited, analyzed, and specified software product requirements, and generated product personas and user stories
- Applied user story mapping to refine and prioritize backlog items, and designed medium to high fidelity UI wireframes
- Modeled user flow, behavior, and structure with UML 2.0, created use case specifications, and worked with design and development teams to clarify and review requirements

Business Systems Analyst

Alo Application Co.

Jan 2021 to Nov 2021

Tehran, Iran

- Gathered and analyzed functional and non functional business and stakeholder requirements
- Modeled core business processes with BPMN 2.0 and designed the software data model with ERD
- Applied Behavior-Driven Development for living documentation and acceptance tests, and Domain-Driven Design with event storming to classify business entities, and authored SRS documents

Business Analyst

Algorithm Pars Co.

Sept 2020 to Dec 2020

Tehran, Iran

- Designed the data model and low fidelity UI wireframes for HSE software modules, and created SRS documents
- Applied BDD for living documentation of customer needs and acceptance tests, and DDD with event storming to identify business domains

Junior System Analyst

ARKA DML Co.

Oct 2019 to Sept 2020

Tehran, Iran

- Modeled the as is behavior and data model of the implemented software solution using UML diagrams
- Identified test scenarios, created test case documents, and performed static analysis to identify and fix code related issues

EDUCATION

Simon Fraser University

M.Sc. Interactive Arts and Technology

Surrey, BC, Canada

Apr 2023 to Present

Tarbiat Modares University

M.Sc. Systems Engineering (GPA 17.92 / 20)

Tehran, Iran

2019 to 2022

University of Tehran

B.Sc. Industrial Engineering (GPA 17.36 / 20)

Tehran, Iran

2015 to 2019

LANGUAGES

- English (fluent), Farsi (native)
